TBB 127573	REVERSE LT CLEAR INCAND

Weldon has discontinued the current incandescent and LED Stop/Tail, Turn, Back-up lamps. These lights were replaced by new designs with new improved technology and features. The part numbers we updated this summer for the RED, Amber, and Amber turn. The C2 has different Stop, turn tail light and amber light than the Minotour/HDX/EFX. The reverse light is the same for all models. We had to add a resistor so the lights will be compatible with the Dorian monitor.

Current 5801 Series Incandescent light - Features a flat lens and non-serviceable bulb. 5801-9100 Series- same Fit, slightly different Form, improved Function...serviceable design. The design has a curved lens and uses a serviceable wedge based bulb
