Scheduled laboratory testing of alternators from the assembly line includes a comprehensive "hot performance" test that compares an alternator's performance with the OE-quality standards established for its particular applications.

Alliance alternators are designed for customers who demand reliability and performance. Alliance premium re-manufactured alternator installs quickly and easily, and provides cranking performance you can count on.

Alternators Product Sheet

Product Highlights

- Alliance remanufactured alternators meet or exceed OE Standards- these are remanufactured with in-process inspections/tests throughout the production process
- Alternator bearings, brushes and brush springs are replaced with New
- Rotors are electronically tested for amperage in insulation quality or replaced with new
- Rotor slip rings are machined and checked for concentricity or replaced with New
- Stators are tested for insulation quality, phase balance and amp output or replaced with New
- Regulators are electronically tested to OE specifications or replaced with NEW
- All alternator units are performance tested to measure output curve, turn on speed and other critical specifications with test reports enclosed with the product.
