- Alliance starters are designed for customers who demand reliability and performance. Alliance premium re-manufactured starter installs quickly and easily, and provides cranking performance you can count on.
- Alliance re-manufactured starters meet or exceed OE standards because they're re-manufactured using processes similar to the way new starters are made. Components are gauged, sorted, tested and renewed to OE-quality specifications, and vital parts are replaced with new ones where needed. Every component and part must meet strict Alliance standards.
- Scheduled laboratory testing of starters from the assembly line includes loading the starter to an OE-quality specification.

 Instead of a "one-size-fits-all" approach, our test engineers make certain that each starter model is tested with the load specification for its particular applications.
