Product Highlights

Highest torque rating - Over 5,000 in/lbs of torque to handle nearly any size fan.

Fail-safe design prevents on-the-road failures - Fan clutch automatically engages when it nears the end of its life.

Fewer individual components means less time to install.

High quality internal components for long lifespan.

General Product Information

The key reason for premature spring-engaged fan clutch failures is ***lack of torque***. There are fan blades in operation today that require more torque than current fan clutches can produce. Our spring-engaged rebuild kit is unmatched by any competitors (new or re-manufactured) & packs over **5,000 inch-pounds of torque!**

Highest Torque Rating

Sustaining fan blade engagement requires a large amount of torque. With over 5,000 inch-pounds of torque, our fan clutch will handle nearly all fan blades!

Less Time To Install

Our exclusive design combines nine separate components into **one final assembly** – this dramatically reduces installation time and installation errors.

Fail-Safe Design

Our innovative design will AUTOMATICALLY ENGAGE fan clutches when the friction material nears the end of its life.

Warranty Information

300,000 mile/3 year warranty
