

# Truck-Lite

Truck-Lite began with an ingenious idea that sparked a revolution in truck and trailer safety lighting. Tackling the problem of the short life of trailer lights, founder George Baldwin designed the first sealed marker light, using his kitchen sink for quality control. That first light was a commercial success, and Truck-Lite released the industry's first sealed stop/turn/tail light soon after. Since then, Truck-Lite has grown into an international company with over 3,000 employees.

### **General Product Information**

Truck-Lite has a history of firsts, including the first sealed lighting products, the first LED S/T/T lamps for commercial vehicles and the first LED forward lighting for both military and commercial vehicles. All these firsts represent major industry breakthroughs, but being first isn't enough. Our goal, from design to installation, is to deliver the best. Our products have been copied time and time again, but our superior quality has never been met by others.

The Federal Motor Carrier Safety Administration (FMCSA) has granted tank trailer operators the ability to install brake-activated pulsating lamps on the rear of their trailer in order to increase visibility and reduce the risk of rearend collisions.

Used in addition to traditional tail lamps, Truck-Lite's variety of amber and red

strobes provides the visibility and durability you need to take advantage of this new

ruling - and help keep your fleet safer on the road.
