Hendrickson Air Springs

Ride quality and performance are key factors when designing the internal make-up of Hendrickson air springs. A low natural frequency is achieved through proprietary piston and bump stop components. Hendrickson air springs undergo advanced design and testing processes to provide enhanced suspension ride, handling and performance.

Top Movers - Hendrickson Air Springs

Part Number	Description
HDR 69782 002	AIR SPRING
HDR 57122 002	AIR SPRING ASSY
HDR S 21800	AIR SPRING
HDR R B 14487	AIR SPRING (RIDE)
HDR S 20901	AIR SPRING
HDR R B 14249	AIR SPRING (RIDE)
HDR 67043 002	AIR SPRING ASSEMBLY, FS
HDR R 005079	AIR SPRING LIFT
HDR 60271 002L	AIR SPRING AY-(FS),BOXED
HDR S 22948	AIR SPRING

General Product Information

The Hendrickson Story

The Hendrickson story began in 1913 with the founding of The Hendrickson Motor Truck Company by inventor and businessman Magnus Hendrickson. This small Chicago-based manufacturing company built trucks often equipped with cranes, which were used to haul stone and other building materials.

In 1926, Hendrickson introduced the first tandem truck suspension, which mounted the axles on each end of an equalizing beam. This unique "walking beam" design distributed the truck's load evenly between the two rear axles, which improved traction and greatly reduced the effects of bumps and potholes in the road. The walking beam soon gained widespread acceptance among the industry's new 6x4 "six wheeler" trucks, which allowed more payload.

In 1978, The Boler Company, whose holdings included manufacturers of leaf springs and metal bumpers, purchased Hendrickson. In the years that followed, Hendrickson would expand into or acquire additional businesses in related areas—trailer suspension systems, auxiliary axle systems, springs, metal bumpers, and other heavy-duty components.
