

BettsHD Mud Flap Hangers

Back in 1954, we received the first-ever patent for a mud flap hanger, and we've been committed to developing mud flap installation standards for the heavy-duty trucking industry ever since. As part of the Betts Company family, our history of quality and innovation dates back to the 1860s. With an array of mud flap hanger styles available, we're sure to have the right model for your truck or trailer.

Product Highlights

Bar Type Mud Flap Hangers

We offer straight and angled bar types; both styles are available in rigid or coiled configurations. The best option for cost-conscious drivers.

Spring Loaded Mud Flap Hangers

Specially designed to resist corrosion and wear caused by debris. Straight, angled, and straight-tapered models are available. If you're looking for a long-lasting mud flap hanger, spring loaded is the way to go.

DirectFlex System Mud Flap Brackets

Looking for maintenance-free? Our DirectFlex mud flap kits are as low-maintenance as they come. With three mounting options, you can install them in whatever way works best for you.

Lighted/Spring Loaded

Our patented TECH-TEN mud flap hangers are the best of the best. These deluxe brackets are easy to install and maintain, and are available in straight, angled, and straight-tapered styles.

General Product Information

Bar Type Mud Flap Hangers

Mud flap regulations can vary greatly from state to state, so it's best to follow general guidelines and keep your mud flaps at no more than six inches from the ground. In order to properly adjust your mudflaps, you need mud flap hangers.

BettsHD manufactures a full line of durable, low maintenance, bar type mudflap hangers, making it easy to find the right option for your truck or trailer. We offer both straight and angled bar type brackets in rigid and coiled configurations.

Spring Loaded Mud Flap Hangers

Specially engineered to meet the FMVSS108 standards mandated for all trucks manufactured after 1 July 1997, our spring loaded mud flap hangers are available in a variety of configurations to meet your needs. The unique pentroof styling of our spring loaded mudflap brackets allows conspicuity tape to be applied directly to the hanger itself without any added material weight.

We've developed a full line of spring loaded mudflap hangers, including straight, tapered, angled and lighted designs, making it easy to find the right model for your truck or trailer. Open wound springs reduce corrosion, while self-centering tombstones ensure positive alignment. Welded end caps virtually eliminate the intrusion of foreign elements.

We offer spring loaded mud flap brackets in packaged pairs or individually. All our mud flap brackets are 100% made in the USA.

DirectFlex® Mud Flap Retention System

BettsHD's DirectFlex® system is the only patented mud flap retention system on the market. DirectFlex® (as in *Directional Flexibility*) has no moving components, making the system nearly maintenance free. Three mounting bracket options are available to accommodate all common installation configurations. The DirectFlex® system is available in both straight and angled styles.

The DirectFlex® mud flap retention system is 100% made in the USA, and built tough to avoid costly downtime for flap hanger repairs. It works with both standard mudflaps and our proprietary ChannelFlap™ mudflaps. Integrated conspicuity markers meet all DOT requirements.

Trailer Mud Flap Retention System

Our trailer mud flap retention system features innovative spring steel mounting brackets, coupled with either our DirectFlex or spring loaded mud flap hangers.

System Main Benefits

- Installed and repaired with common hand tools
- NO WELDING REQUIRED
- Repairs in the field or on the roadside are easier than ever

System Options

The BettsHD trailer mud flap retention system is available in two styles: Heavy Duty and Severe Duty Premium. The Heavy Duty option includes spring loaded mud flap hangers; the Severe Duty Premium option features our patented DirectFlex® mud flap hangers.

Three kit options are available for both styles:

- Left-hand replacement or new installation
- Right-hand replacement or new installation

Warranty Information

BettsHD is part of a family-owned business founded in 1868. You can count on BettsHD answering your phone call or email and solving problems related to product damage or defects, just like we have for nearly 150 years.

Our standard product warranty is extensive but one element of our 100% Customer Loyalty Promise stands out: BettsHD promises to be loyal to loyal customers. We demonstrate our loyalty by considering any reasonable request for product support outside the terms of our legal product warranty and responding promptly and professionally.

Our promise of loyalty extends to and through our distributor partners, who are often best positioned to provide immediate response to problems causing downtime. We will “make things right” in ways you may find noteworthy and surprising. Rest assured we have not sustained a successful business for nearly one hundred fifty years by turning our backs on loyal customers whose problems we are compelled to solve.
